Unit Testing For AboutUs, Notifications, Profile, Rules and FAQ

Test cases completed for AboutUs (Manual Testing)

- Checked to see if the text was displayed properly
- Headers are used correctly to separate the sections
- Checked for grammar and typos

Test cases completed for Notifications (Manual Testing)

- Notified when your listing is ready to raffle
- Notification number goes away when you click on the listing that you were notified for
- Notification can be deleted successfully with the delete button
- Everyone who bet on an item that was raffled gets a notification

Test cases completed for Profile (Manual Testing)

- Username displays correctly
- Update profile info button works properly
- Bio is updated when update bio button is clicked
- No entry into the update profile produces "User has no bio" as it is supposed to
- Email is displayed properly
- Balance is displayed properly
- Add balance button works
- Correct amount of balance is added

Test cases completed for Rules and FAQ (Manual Testing)

- Text displays properly
- Both rules and FAQ headings are displayed properly
- Checked for grammar and typos
